# RETAILERS ONLY PAY FOR ADVERTISING THAT WORKS

With **GitKash**, brick-and-mortar retailers can easily create ads for nearby mobile phone users. Ads that drive customers into the store at specific times. Ads that attract new customers. Ads that increase the average value of the sale. And loyalty programs that encourage repeat business. With **GitKash**, retailers know which ads are working and which ones aren't...and only pay for those that do.

GitKash requires no installations, integration, or business process changes. It is managed through a simple web interface. A new ad campaign or loyalty program can be created on-line, in under five minutes. You'll know how many people are responding to each ad you create, how much customers are spending because of that ad, and exactly when they are spending it.

Isn't it time to ride the mobile advertising wave, address a whole new customer base, and know that your ads are working? Try **GitKash** today. You won't pay for anything except success.

Visit **www.gitkash.com** or contact us at **info@gitkash.com** for more information.
